OK Cancel Clear Help

1- **Source Organization :-** Akhnaton Master Inventory Organization

2- **Hierarchy Origin: -**

Enter a hierarchy origin (organization) for which you would like to assign items.
This organization may have subordinate organizations.

In our case you can enter Akhenaten warehouse branches for local items and KSA
For export Items.

3- **Hierarchy Name: -**

Enter valid organization hierarchy name from the list of values.

In our case it is ATR Locale Hierarchy for local items and ATR Export Hierarchy
For export Items.

4- **Category :- (option)**

Category Set Name = ATR Sales Item Category

The image shows two overlapping SAP configuration windows. The top window, titled 'Parameters', has the following fields:
